

Aminomax Color Brighter and Taste Sweeter Type

CITYMAX[®]
— IDEAL FOR GREEN —

More Information

This product is specially developed for the color and sweetening of fruits, based on Citymax's research on biostimulants. It makes the planting return to the concept of nature, using astaxanthin purified from natural *Haematococcus pluvialis*, fusion of glycine, phenylalanine and other beneficial amino acids derived from enzymatically hydrolyzed soybean meal, and combined with organic potassium nutrition. It can effectively promote the color change of the fruit, increase the soluble solid content, make the sugar-acid ratio suitable, and return the flavor to the original natural favor.

Composition / Analysis:

APPEARANCE	LIQUID
P2O5+K2O	≥500g/L
P2O5	≥100g/L
K2O	≥400g/L
Sugar Alcohol	≥50g/L
Glycine	≥40g/L

APPEARANCE	LIQUID
Phenylalanine	≥1g/L
Astaxanthin	≥10mg/L
Phosphorous Acid	≥10g/L
PH (1:250 times dilution)	4.5-6.5

Application

Applicable crops: All kinds of cash crops such as fruit trees, vegetables and fruits.etc.

Application: Use it from the late stage of fruit expansion to the coloring stage, diluted 600-1200 times and spray evenly, with an interval of 7-14 days-times.

It is recommended to spray before 10 a.m. or after 4 p.m., and it needs to be sprayed if it rains within 6 hours after spraying.

Benefits

Early coloration: It is rich in astaxanthin purified by natural *Haematococcus pluvialis* and enzymatically hydrolyzed soybean meal phenylalanine, which can promote the synthesis of anthocyanins and carotenoids in the fruit, promote the early coloration of the fruit, and the color is natural and pure.

Increase Sugar Content: Natural glycine and high content of organic potassium nutrition can effectively promote the accumulation of fruit nutrients and make the sugar. The amount increases, the sugar-acid ratio is suitable, the Vc increases, the fruit shape is more beautiful, the hardness increases, and the appearance is better.

Natural Flavor: Rich in natural organic substances, it can optimize the physiological metabolism of plants, promote the release of phenols, esters and other flavor substances, have a better taste, and return to the natural original taste.

Packaging

1L, 5L, 20L, 200L, 1000L, Flexi bag, etc. available

Office: Room Maike Business Centre, No.12 Jinye Road, Yanta District, Xi'an, China.

Plant: Chemical Industry Zone, YongShou, Shaanxi, China
