

Ultra HumiMax

More Information

Ultra HumiMax is a type of Potassium Humate organic fertilizer derived from Leonardite, and can be used for foliar spray and drip irrigation. It has the necessary nutrients to improve crop quality and yield in both flake and powder form.

Composition / Analysis:

APPEARANCE	BLACK SMALL FLAKE
Humic Acid (Dry Basis)	80%
Water Solubility	99%
Potassium (As K ₂ O)	10%
PH Value	9-11
Loss on Drying	≤ 1%
Moisture	≤15%

Application

Suitable for all agricultural crops, fruit trees, landscaping, gardening, pastures, grains and horticultural crops, etc.

Soil Application: 8- 12kg/ha, Irrigation: 8- 12kg/ha

Foliar Application: 5-8kg/ha with the dilution rate of 1:600-800

Benefits

- Increases organic matter of soil
- Improves crop respiration and photosynthesis
- Improves potash fertilizer utilization
- Slows decomposition to increase the release of potassium
- Improves the content of available K
- Long-lasting and fast-acting
- Enhances water holding capacity of soil
- Reduces soil erosion and improves workability of soil
- Regulates the release of nutrients
- Improves the quality of agricultural crops
- Improves efficacy of Herbicide
- Improves the efficiency of fertilizer

Packaging

1kg, 5kg, 10kg, 25kg per bag

Office: Room Maike Business Centre, No.12 Jinye Road, Yanta District , Xi'an, China.

Plant: Chemical Industry Zone, YongShou, Shaanxi, China
