

Humicare Fruit Coloring and Swelling Type

More Information

Humicare Fruit Coloring and Swelling Type is a kind of functional liquid fertilizer with synergistic effect of organic and inorganic nutrients. It adopts the unique MRT molecular recombination technology to obtain small molecular organic matter, and perfectly integrates with nitrogen, phosphorus, potassium and other nutrients to meet the needs of different nutrients in different growth stages of crops. It also has the functions of high resistance to hard water, activating soil, strong rooting, stress resistance and promoting growth, and improving quality.

Composition / Analysis:

INGREDIENTS	CONTENTS	INGREDIENTS	CONTENTS
Humic acid	≥ 100g/L	P2O5	150g/L
NPK(N+P2O5+K2O)	≥410g/L	K2O	220g/L
N	40g/L	PH(1:250 Dilution) Value	8.2

Application

Fertilization methods such as flushing, drip irrigation, spray irrigation and root irrigation can be used, once every 7-10 days, the recommended dosage is 50L-100L/ha . When using drip irrigation, the dosage should be reduced as appropriate; when using root irrigation, the minimum dilution ratio should not be less than 300 time.

Benefits

Beautify fruit type: the synergistic effect of organic and inorganic nutrients can meet the absorption and utilization of nutrients, and the fruit type can be corrected and more beautiful . The fruit shape is uniform and the color is pure . Early coloration: small molecular humic acid can improve the absorption and utilization of NPK nutrients through chelation. NPK nutrients, especially potassium elements, are sufficient, resulting in faster fruit bulking, more carbohydrate formation and earlier coloration . Deacidification and sweetening: synergistic with organic and inorganic nutrients, more sugar, fat and protein are formed in the fruit, and sugar content is increased, more soluble solids, better storage resistance and better flavor.

Packaging

5L, 20L

Office: Room Maike Business Centre, No.12 Jinye Road, Yanta District , Xi'an, China.

Plant: Chemical Industry Zone, YongShou, Shaanxi, China
