

Humicare Crop Growth-promoting Type

More Information

Humicare Crop Growth-promoting Type is a kind of functional liquid fertilizer with synergistic effect of organic and inorganic nutrients. It adopts the unique MRT molecular recombination technology to obtain small molecular organic matter, and perfectly integrates with nitrogen, phosphorus, potassium and other nutrients to meet the needs of different nutrients in different growth stages of crops. It also has the functions of high resistance to hard water, activating soil, strong quality.

Composition / Analysis:

INGREDIENTS		CONTENTS		INGREDIENTS		CONTENTS	
Humic acid		≥ 100g/L		P2O5		40g/L	
NPK(N+P2O5+K2O)		≥300g/L		K2O		60g/L	
N		200g/L		PH(1:250 Dilution) Value		5.3	

Application

Fertilization methods such as flushing, drip irrigation, spray irrigation and root irrigation can be used, once every 7- 10 days, the recommended dosage is 50L-100L/ha. When using drip irrigation, the dosage should be reduced as appropriate;

when using root irrigation, the minimum dilution ratio should not be less than 300 times.

Benefits

Quick seedling raising: High content of small molecule humic acid and high content of nitrogen source can effectively promote the rapid absorption of nutrients and photosynthesis of seedlings, promote the accumulation of dry matter, and promote the rapid leaf growth of seedlings with dark green leaves and vigorous growth.

Stem thick: The synergistic effect of organic and inorganic nutrients meets the needs of plant growth, while optimizing crop agronomic traits to make the stalk thicker, stronger and more powerful.

Deep root system: Organic small molecule carbon source stimulates the growth of crop root tips, increasing white roots and rooting under fibrous roots. At the same time, enhances the activity of rhizosphere microorganisms, secretes more root promoting substances, and makes more roots deep.

Packaging

5L, 20L

Office: Room Maike Business Centre, No.12 Jinye Road, Yanta District, Xi'an, China.

Plant: Chemical Industry Zone, YongShou, Shaanxi, China
