

AminoMax LQ 7-0-0

More Information

Amino Max LQ 7-0-0 used modern enzymatic hydrolysis process. This production process decided that all the Nitrogen in this liquid are organic Nitrogen.

Composition / Analysis:

APPEARANCE	YELLOW BROWN LIQUID
Amino Acid	≥40%
Organic Nitrogen	7%- 11%
PH Value	4-6

Application

Greenhouse vegetables

7 L/ha in 2-3 application in 10- 15 days from planting to the whole crop season

Fruit trees

5 L/ha in 2-3 applications in 10- 15 days from the pre-blooming stage

Open field vegetables

5 L/ha in 2-3 applications in 7- 10 days after the first true leaf stage

* The recommendation may be different according to the soil characteristics and local conditions.

Benefits

- Improves the photosynthetic efficiency
- Resists acid and alkali fluctuation to maintain a balanced p H level .
- Increase the efficiency of various pesticides
- Accelerates nutrient uptake
- Improves stress tolerance of crops
- Increases yield from 10-30%
- Stimulates crop growth
- Improves various enzyme activities
- Improves the quality of fruit

Packaging

1L per bottle or 5L, 20L, 25L, 200L per barrel

Office: Room Maike Business Centre, No.12 Jinye Road, Yanta District , Xi'an, China.

Plant: Chemical Industry Zone, YongShou, Shaanxi, China
